

Dear Team,

Please go through the below documentation for Phonepe PG Integration:

### Payment Initiation

#### Web Integration

- Pay API for web flow: <https://developer.phonepe.com/v1/reference/pay-api#pay-request-for-web-flow>

#### Android Integration

- Android PG SDK - <https://developer.phonepe.com/v1/docs/android-pg-sdk-integration>
- Android PG SDKLess - <https://developer.phonepe.com/v1/docs/android-pg-sdkless-integration>

#### IOS Integration

- IOS PG SDK - <https://developer.phonepe.com/v1/docs/ios-pg-sdk-integration>
- IOS PG SDKLess - <https://developer.phonepe.com/v1/docs/ios-pg-sdkless-integration>

### Response Authorization

#### Check Status API

- Check Payment Status - <https://developer.phonepe.com/v1/reference/check-status-api>
- Server-to-Server Response - <https://developer.phonepe.com/v1/reference/server-to-server-callback-4>

### Refund Initialization

### Refund Flow

- Refund API - <https://developer.phonepe.com/v1/reference/refund-6>
- Refund Status API - <https://developer.phonepe.com/v1/reference/check-status-api>

### UAT Simulator

Please use **UAT Merchant Simulator** for testing: <https://developer.phonepe.com/v1/docs/uat-simulator-1>

[The merchant simulator is used to simulate the end-to-end payment flows for online merchants. A template is a mapping of APIs and their mock responses using which merchants can simulate the scenarios like Success, Failure, and Pending]

**Test Credentials:** <https://developer.phonepe.com/v1/docs/uat-testing#plugin-integration---test-setup>

**Note:** Please make sure to set the Postman template before attempting to test the UAT simulator.

### Go Live

**Production Host URL:** <https://api.phonepe.com/apis/hermes>

**Pay API:** <https://api.phonepe.com/apis/hermes/pg/v1/pay>

**Check Status API:** <https://api.phonepe.com/apis/hermes/pg/v1/status/{merchantId}/{merchantTransactionId}>

**Refund API:** <https://api.phonepe.com/apis/hermes/pg/v1/refund>

Please refer to this for UAT to Production migration: <https://developer.phonepe.com/v1/docs/how-to-go-live-1>

**Checklist for Phonepe PG integration:** <https://developer.phonepe.com/v1/docs/pg-standard-checklist>

*Kindly list all your queries related to PhonePe implementation in the below format.*

1. API Host
2. Request Payload
3. Response Payload
4. Integration type(Web/Android/IOS)

In case of any query, please feel free to reach out to us at [merchant-pgsupport@phonepe.com](mailto:merchant-pgsupport@phonepe.com)

**Thanks & Regards,**

**PhonePe Integration Team**
